

Curriculum Vitae

Sohrab Ismail-Beigi
Department of Applied Physics
Yale University
P.O. Box 208284
New Haven, CT 06520
phone: (203) 432-2107
fax: (203) 432-4283
E-mail: sohrab.ismail-beigi@yale.edu
Web: <http://volga.eng.yale.edu>
Google scholar: <https://scholar.google.com/citations?user=dOsHUoMAAAAJ>
Citizenship: USA

1. ACADEMIC AND PROFESSIONAL HISTORY

- **A.B. in Physics, Harvard University, Cambridge, Massachusetts. 1989-1993.**
 - **D.E.A. degree in Statistical Physics and Non-linear Phenomena, Ecole Normale Supérieure de Lyon, Lyon, France. 1993-1994.**
 - **Ph.D. in Physics, MIT, Cambridge, Massachusetts. Student of Prof. Tomás Arias. 1994-2000.**
 - **Postdoctoral Researcher in Physics, University of California at Berkeley and Lawrence Berkeley National Laboratory, Berkeley, California. Worked in the group of Prof. Steven G. Louie. 2000-2003.**
 - **Assistant Professor, Department of Applied Physics and Department of Physics, Yale University, New Haven, Connecticut. 2003-2007**
 - **Associate Professor on term, Department of Applied Physics and Department of Physics, Yale University, New Haven, Connecticut. 2007-2011**
 - **Associate Professor with tenure, Department of Applied Physics and Department of Physics, Yale University, New Haven, Connecticut. 2011-2014**
 - **Professor with tenure, Department of Applied Physics, Department of Physics, and Department of Mechanical Engineering and Materials Science, Yale University, New Haven, Connecticut. 2015-present**
-

2. FUNDING

Present funding

- **EAGER: Enabling Quantum Leap: 2D metal oxides (2DTMOs) hosting strongly bound excitons (PI Sohrab Ismail-Beigi, 7/15/2018-6/30/2020, \$300,000): NSF DMR 1838463.** Collaboration with Charles Ahn and Fred Walker to create and understand 2D transition metal oxide excitonic materials. Supports one graduate student in Ismail-Beigi group.
- **SI2-SSI: Collaborative Research: Scalable, Extensible, and Open Framework for Ground and Excited State Properties of Complex Systems, (PI Sohrab Ismail-Beigi, 9/12/2013-9/30/2018, \$1,226,000): NSF ACI-1339804.** Collaboration with IBM (Dr. Glenn Martyna) and UIUC (Prof. Sanjay Kalé) to enhance the OpenAtom highly scalable parallel software. Funds two postdocs in Ismail-Beigi group.

- Control and Design of Two Dimensional Silica Structures, (PI Eric Altman, co-PIs Udo Schwarz and Sohrab Ismail-Beigi, 9/1/2015-8/31-2019, \$475,000): NSF DMR-1506800. Funds one half graduate student in Ismail-Beigi group.
- Dynamically configurable memory technology based on ferroelectric-gated field effect transistors, (PI Tso-Ping Ma, co-PI Sohrab Ismail-Beigi), 9/1/2016-8/31/2019, \$345,000): NSF/ENG/ECCS-BSF 1609162. Funds one graduate student in Ismail-Beigi group.
- Ab initio studies of nanostructured materials TG-MCA08X007, (PI Ismail-Beigi), yearly competitive grant from NSF XSEDE supercomputing resources to Ismail-Beigi group to perform first principles computations. Has been continuously obtained by the group since 2011.

Previous Funding

- Massively-parallel Electronic Structure Calculations for Energy Applications (PI Sohrab Ismail-Beigi, 5/1/2016-8/30/2018, \$14,000 for two years for travel only): NSF OAC 1614491. This is a supercomputing grant for using the NCSA BlueWaters supercomputer with 16.12 million node hours to study metal organic frameworks for hydrogen storage; the funds are only for travel to NCSA and the annual PI workshop.
- IRG1 co-leader in CRISP (Center for Research on Interface Structures and Phenomena) which is Yale's NSF MRSEC (PI Charles Ahn, 09-/2011-08/2017, \$7,000,000 first year): NSF DMR-1119826. Previous Yale MRSEC (2005-2011) and current one support two graduate students and one postdoctoral fellow in Ismail-Beigi group.
- Subaward from the UCLA "Functional Accelerated Nano-Material Engineering (FAME)" research center award (MARCO Contract No. 2013-MA-2382 from the Microelectronics Advanced Research Corporation), 11/01/2015-12/31/2017, \$160,000 per year. Funded one postdoc in Ismail-Beigi's group.
- First Principles Investigations of Boron Nanostructures (PI Sohrab Ismail-Beigi, 9/2011-08/2014, \$300,000, no-cost extension until 2016): NSF DMR-1104974. Supported one graduate student in Ismail-Beigi group.
- Enhancement of NO_x Decomposition Through Ferroelectric Supports (PI Eric Altman, 07/2011-12/2014, \$149,709/year): Toyota Motor Engineering and Manufacturing, North America, Inc. Supported one graduate student in Ismail-Beigi group.
- Atomic Engineering of Superconductors by Design (PI Charles Ahn, 6/2010-07/2013, \$449,885/year): DOD DARPA W911NF-10-1-0206. Supported one graduate student or postdoc in Ismail-Beigi group.
- Founding co-PI on NSF DMR-0520495 MRSEC/Materials Research Science and Engineering Center for Research on Interface Structures and Phenomena (PI John Tully, 10/2005-09/2011, \$6,390,000 total). Supported two graduate students in Ismail-Beigi group and one joint postdoctoral fellow in Ismail-Beigi and Tully groups.
- NSF DMR-0808665: First Principles Investigations of Boron Nanostructures (PI Sohrab Ismail-Beigi, 9/2008-08/2011, \$240,000). Supported one graduate student in Ismail-Beigi group.
- Acquisition of a High Performance Computational Cluster for Yale University (PI Steven Girvin, 7/2008-6/2012, \$500,000): NSF MRI CNS-0821132. Allowed for the acquisition of the Bulldog L FAS HPC computer cluster.
- SOLAR: Novel Nanomaterials, Assembly and Mathematical Analysis for Ultra-High Efficiency Photovoltaic Systems: A New Paradigm in Solar Cells (PI Lisa Pfefferele, 8/2009-7/2012, \$1,143,530): NSF DMR 0934520. Supported one postdoctoral fellow in Ismail-Beigi group.

4. HONORS AND INVITED PRESENTATIONS

- Winner of a Certificate of Distinction in Teaching Award (*Spring 1992*).
- Elected to Phi Beta Kappa as a Junior (*Spring 1992*).
- Graduated *summa cum laude* from Harvard University (highest academic ranking) (*June 1993*).
- Winner of the Hoopes Prize for excellence in undergraduate research in Physics. Thesis title: “Development of a New Interatomic Potential for silicon”; under the direction of Prof. Efthimios Kaxiras, Dept. of Physics (*June 1993*).
- Funding for Studies in Lyon provided by a Rotary International Ambassadorial Scholarship (*September 1993-June 1994*).
- IBM Faculty Award (*2006*).

Invited talks and/or keynote presentations:

- The Workshop on Recent Developments in Electronic Structure Methods, Atlanta, GA (*May 2000*).
- The Workshop on Recent Developments in Electronic Structure Methods, Princeton, NJ (*June 2001*).
- The 11th International Workshop on Computational Physics and Materials Science, Trieste, Italy (*January 2003*).
- Theory and Modeling of Electronic Excitations in Nanoscience Conference, Acquafredda di Maratea, Italy (*September 2004*).
- Yale Physics Club Colloquium (*January 21, 2005*).
- Workshop on Recent Developments in Electronic Structure Methods, Cornell, NY (*June 2005*).
- Department of Materials and Interfaces seminar speaker, Weizmann Institute, Israel (*January 2006*).
- The American Ceramics Society GOMD Spring meeting, Greenville, SC (*May 2006*).
- Excitonic Processes in Condensed Matter Conference, Winston-Salem, NC (*June 2006*).
- Computational Methods for Nanoscale Systems, Hong Kong (*December 2006*).
- Laboratory for Surface Modification Seminar, Rutgers University, NJ (*February 2007*).
- Laboratory for Research on the Structure of Matter Seminar, University of Pennsylvania, PA (*March 2007*).
- Computational Materials Seminar, Cornell University, NY (*April 2007*).
- Condensed Matter Seminar, Case Western Reserve University, OH (*January 2008*).
- Physics Colloquium, SUNY Buffalo, NY (*March 2008*).

- Physical Science Seminar, IBM Yorktown, NY (*May 2008*).
- Time-Dependent Density-Functional Theory: Prospects and Applications, Benasque, Spain (*September 2008*).
- 15th International Workshop on Oxide Electronics, Estes Park, Colorado (*September 2008*).
- Molecular Foundry & NCEM Users' Workshop 2008, Berkeley (*November 2008*).
- BECAT-IBM Workshop on High Performance Computational Science and Engineering, U. Conn. Storrs (*December 2008*).
- The 2nd International Workshop: Nanoxide (oxide interfaces), Valbella Grisons, Switzerland (*April 2009*).
- 16th International Workshop on Oxide Electronics, Tarragona, Spain (*October 2009*).
- Physical Chemistry Seminar, University of Pennsylvania, PA (*January 20, 2011*).
- CECAM/Psi-k Workshop on Challenges and solutions in GW calculations for complex systems, Lausanne, Switzerland (*June 2011*).
- Computational Surface Science 2011 Workshop, Santa Barbara (*August 2011*).
- Applied Physics Seminar, Harvard University, MA (*October 21, 2011*).
- Materials Science and Engineering Colloquium, Columbia University, NY (*November 4, 2011*).
- Condensed Matter/Materials and Biological Physics Seminar, Washington University in St. Louis, MO (*December 12, 2011*).
- March APS Meeting, Boston, MA (*March, 2012*).
- The 24th Annual Workshop on Recent Developments in Electronic Structure Theory, Wake Forest University, Winston-Salem, NC (*June 2012*).
- CECAM/Psi-k Workshop on What about U? - Corrective approaches to DFT for strongly-correlated systems, Lausanne, Switzerland (*June 2012*).
- Santorini II in Mallorca: Workshop on the Physics of Complex Oxides, Mallorca, Spain (*October 2012*).
- AVS meeting (59th in Tampa Florida), session on Structure Property Relationships in Epitaxial Oxide Interfaces, Tampa, FL (*November 2012*). (Talk canceled due to Hurricane Sandy)
- 290K Condensed Matter Seminar, Department of Physics, University of California at Berkeley, Berkeley, CA (*February 2013*).
- Physics Colloquium, University of Illinois at Chicago (UIC) (*March 2013*).
- German Physical Society (DPG) Spring meeting 2013, Regensburg, Germany (*March 2013*).
- Telluride Workshop 2013 on Physics of Emergent Correlated Materials, Telluride Science Center, Telluride, CO (*June 2013*).
- Hayashi Conference: Next decades of Surface Science, Shonan Village Center, Hayama, Japan (*July 2013*).
- Materials for a Sustainable Energy Future: Fuels from Sunlight (Workshop II), Institute for Pure and Applied Mathematics, University of California at Los Angeles, CA (*October 2013*).
- Physics at the Falls: Structural and Electronic Instabilities in Oxide Nanostructures, SUNY Buffalo, Buffalo, NY (*May 2014*).

- American Chemical Society Fall meeting 2014, invited talk, San Francisco, CA (*August 2014*).
- Physics Colloquium, Temple University, Philadelphia, PA (*September 2014*).
- March APS Meeting, San Antonio, TX (*March, 2015*).
- The 8th Workshop for Emergent Materials Research, POSTECH University, Pohang, South Korea (*July, 2015*).
- Materials Science and Engineering Colloquium, University of Illinois at Urbana-Champaign (UIUC), Urbana-Champaign, IL (*November 2015*).
- Invited speaker to the NSF-MolSSI Sponsored Workshop on Materials Software, Berkeley, CA (*February, 2017*).
- Invited talk at the March APS Meeting, New Orleans, LA (*March, 2017*).
- Seminar at the Institute for Computational Engineering & Science, University of Texas at Austin (*April 2017*).
- 24th International Workshop on Oxide Electronics, Chicago, IL (*September 2017*).
- Center for Integrated Quantum Materials seminar, Harvard University, Cambridge, MA (*October 2017*).
- Invited talk at Fall MRS meeting, Boston MA (*November 2017*).
- Department of Materials Science and Engineering Seminar, University of Connecticut, Storrs, CT (*February 2018*).
- Invited talk at ACS spring meeting, New Orleans, LA (*March 2018*).
- Materials by Design Workshop, Center for Computational Quantum Physics at the Flatiron Institute (Simons Foundation), New York, NY (*July 2018*).
- Invited talk at Fall MRS meeting, Boston MA (*November 2018*).
- Chemical Engineering and Materials Science Seminar, University of Minnesota Twin Cities, Minneapolis MN (*November 2018*).
- Physics and Astronomy Colloquium, Vanderbilt University, Nashville TN (*January 2019*).

5. INTERNATIONAL COLLABORATORS

Prof. H.-C. Hsueh (Department of Physics, Tamsui University, Taiwan): began a collaboration based on an invited ten day visit to Taiwan (*Spring 2004*).

Prof. Leeror Kronik (Department of Materials and Interfaces, Weizmann Institute): began a collaboration based on an invited two week visit to Israel (*January 2006*).

Dr. Yoshifumi Noguchi (Department Physics, Tokyo University): visited Ismail-Beigi group in fall of 2011 as a visiting scholar and began collaboration on photovoltaics project.

Mr. Thomas Mellan and Prof. Ricardo Grau-Crespo (Department of Chemistry, Univeristy College London): Mr. Mellan, a graduate student supervised by Prof. Grau-Crespo, visited CRISP and Yale March-May 2013 to begin a research collaboration on the physics of manganite thin films and heterostructures.

6. RESEARCH SUPERVISION

APHY 448	Solid State 1	2018 Fall
APHY 470	Statistical methods in science and finance	2019 Spring

8. SERVICE TO YALE

FAS and ITS High Performance Computing (HPC) committees: were composed of faculty, administrators, and ITS staff and are responsible for setting the direction of HPC computation in FAS. They plan major hardware and software acquisitions, set and enforce policies regarding access and use of HPC facilities, resolve user problems, prepare plans for modifications and improvements of the facilities, and act as the highest authority in FAS regarding HPC planning, issues, and concerns. From 2007-2013, there were two committees: a larger one chaired by the Deputy Provost Prof. Steven Girvin which met relatively infrequently to vote on major issues or discuss long-range plans. A second HPC subcommittee was co-chaired by Profs. Paolo Coppi and Sohrab Ismail-Beigi and met on average once or twice a month and prepared drafts of long-term plans, answered user concerns and questions, got regular updates from ITS, drafted modifications of current policies to ensure fair HPC usage by all users, etc. Since the summer of 2013, the committees were reorganized and Ismail-Beigi became a member of the formed Planning Committee. Since 2015, Yale formed the Yale Center for Research Computing to provide permanence and continuity to HPC efforts at Yale, and Ismail-Beigi is a member of the Steering Committee.

Other committee duties are listed in the table below.

Committee	Function	Semester
HPC committee	member	2007-2013
HPC subcommittee	co-chair	2007-2013
HPC committee	selection committee member & interviewer for two HPC technical positions	2008 Spring
HPC Operations and Planning Committee	member	2013-2014
Yale Center for Research Computing Steering Committee	member	2015-present
Yale Committee on Procedures for Faculty Misconduct	member	2016-2018
Panel on Quantum Science and Engineering for Yale Science Strategy Committee	presenter	Oct. 2017
Yale Conflict of Interest Committee	member	2018-2019
Physical Science & Engineering Area Committee and Tenure Appointments Committee	member	2019-2021

Seminar series organizer

Organization	Seminar series	Semester
Applied Physics	Solid State and Optics Seminar	2006-2008, Spring & Fall
Applied Physics	Monday Evening Graduate Student Seminar	2006-2008, Spring & Fall
CRISP	CRISP internal and external seminars	2005-2011
CRISP	CRISP IRG1 internal and external seminars	2011-2017

Departmental committees (admissions, faculty searches, qualifying exams)

Department	Function	Semester
Applied Physics	graduate admissions committee member	2004 Spring
Physics	qualifying exam committee	2005 Fall
Applied Physics	graduate admissions committee member	2005 Spring
Applied Physics	graduate admissions committee member	2006 Spring

Physics	qualifying exam committee	2018 Fall
Applied Physics	junior CME faculty search committee chair	2018 Fall-2019 Spring
Applied Physics	graduate admissions committee member	2019 Spring

Graduate thesis and examination committees

Committee	Department	Student	Advisor	Year(s)
Oral Exam	Physic	Lei Fang	Alhassid	2003
Special Investigation	Applied Physics	Blair Connelley	Long	2003-2004
Ph.D. Thesis	Electrical Eng.	Wenyong Wang	Reed	2004
Special Investigation	Applied Physics	Shruti Mohanty	—	2004
Area Exam	Applied Physics	Huiqiong Wang	Henrich	2004
Oral Exam	Physics	Minghao Shen	Schoelkopf	2004
Oral Exam	Physics	Yuan Huang	Alhassid	2004
Ph.D. Thesis	Physics	Lei Fang	Alhassid	2005
Ph.D. Thesis	Physics	Minghao Shen	Schoelkopf	2005
Special Investigation	Electrical Eng.	Xiao Pan	Ma	2005
Oral Exam	Physics	George Mias	Girvin	2005
Special Investigation	Chemical Eng.	Yung-Ruey Yen	Altman	2006
Ph.D. Thesis	Physics	Jun Wang	Altman	2007
Ph.D. Thesis	Applied Physics	Huiqiong Wang	Henrich	2007
Ph.D. Thesis	Applied Physics	Agham Posadas	Ahn	2007
Ph.D. Thesis	Physics	Yuan Huang	Alhassid	2008
Area Exam	Applied Physics	Jarrett Moyer	Henrich	2008
Area Exam	Applied Physics	Yaron Segal	Ahn	2008
Ph.D. Thesis	Chemical Eng.	Fang Fang	Pfefferle	2008-2014
Special Investigation	Applied PHYSICS	Emily Allen	Ahn	2008-2009
Ph.D. Thesis	Physics	Li Ge	Stone	2010
Ph.D. Thesis	Applied Physics	Yaron Segal	Ahn	2011
Ph.D. Thesis	Applied Physics	Jarrett Moyer	Henrich	2011
Special Investigation	Applied Physics	Eric Jin	Ahn	2011-2012
Ph.D. Thesis	Applied Physics	Ankit Disa	Ahn	2012-2016
Ph.D. Thesis	Chemical Eng.	Boris Lukanov	Altman	2012
Area Exam	Applied Physics	Eric Jin	Ahn	2013
Oral Exam	Chemistry	Mikhail Askerka	Batista	2013
Ph.D. Thesis	Mech. Eng. & Mat. Sci	Tianqi Shen	O'Hern	2014
Special Investigation	Applied Physics	Stephen Albright	Ahn	2014
Special Investigation	Mech. Eng. & Mat. Sci.	Zheng Chen	Schwarz	2014
Area Exam	Chemistry	Subhajyoti Chaudhuri	Batista	2015
Area Exam	Mech. Eng. & Mat. Sci	Chao Zhou	Schwarz	2016
Ph.D. Thesis	Mech. Eng. & Mat. Sci.	Omur Dagdeviren	Schwarz	2017
Ph.D. Thesis	Chem. & Env. Eng.	Xiaodong Zhu	Altman	2017
Ph.D. Thesis	Applied Physics	Eric Jin	Ahn	2018
Ph.D. Thesis	Electrical Engineering	Xin (Sylvia) Lin	Reed	2018

Represented Applied Physics at the Yale Engineering tournament: with team member Prof. R. Shankar. Sadly, the mechanical engineering team beat us (*February 2006*).

9. SERVICE TO THE BROADER SCIENTIFIC COMMUNITY

Grant review (individual grants, collaborative grants, and panel reviews) for the National Science Foundation, Department of Energy, Army Research Office, Petroleum Research Council, and the Molecular Foundry (Lawrence Berkeley National Laboratory).

Reviewer for a variety of journals including Physical Review Letters, Physical Review B, Nano Letters, Europhysics Letters, Applied Physics Letters, Surface Science, New Journal of Physics, Nature, Nature Communications, etc.

Co-organizer of Focus Session on Computational Nanoscience at the March meeting of the American Physical Society (Session J26 DMP DCOMP) (*March 2009*).

Co-organizer of Symposium on Emergent Electron Transport Properties at Complex Oxide Interfaces at the Fall MRS 2013 meeting (*November 2013*).

Co-organizer of DMP Focus Session “Complex Oxide Interfaces and Heterostructures” at the APS March meeting 2014 (*March 2014*).

Scientific Advisory Committee of the Center for Functional Nanomaterials at Brookhaven National Laboratory (*May 2019 - present*).

10. BROADER OUTREACH

Continual development of educational web material and actual demonstration kits together with a New Haven high school science teacher (Kenneth Spinka). The aim is to teach basic science and engineering to high school students and teachers and to kindle their interest in these subjects: the vehicle is to explain how modern electronic devices (phones, laptops, hard drives, CD/DVD drives, LEDs, flash drives, transistors) work on the materials science level (*Fall 2008 - present*).

First workshop demonstrating above kits drew ~15 high school teachers to Yale where we had lectures, hands on demonstrations, use of the kits, Q&A, and plenty of pizza (*March 24, 2010*).

Public lecture to Chemistry 21 (high school) students at SCSU introducing them to materials physics, materials science, the ideas behind theoretical studies of materials using fundamental physics, and the impact of such research on science and technology (*March 2012*).

Lecture to summer SCHOLARS students at Yale on nanotechnology in every day devices and the basis for magnetic storage of information (*July 2014*).

Public lecture on “How Things Work: The Nano of Computers” organized by CRISP and Yale Pathways to Science, Davies Auditorium at Yale (*September 23, 2014*).

Advisory board member of the Center for 21st Century Skills.

Other local outreach:

Location	Function	Semester
Wilbur Cross High School	Science Fair judge	2005 January
New Haven Science Fair	Judge	2005 March
Sheridan Comm. and Tech. Magnet School	Science Fair judge	2006 January
Riverside Educational Academy	Science Fair judge	2006 January
Sheridan Comm. and Tech. Magnet School	Met with robotics class to discuss careers in science	2006 January
New Haven Science Fair	Judge	2007 March
